OF TRANSPORT
ENGINEERING

THE WORLD IS IN MOTION, WE KNOW HOW!

RAIL VEHICLES

Are you interested in railway technology?

Would you like to develop skills relevant to the modern rail vehicle industry? Join us for the two-year Master's Degree Study Programme in [Rail Vehicles](#).

[Our aim](#) is to provide students with comprehensive knowledge of the design, manufacturing, testing, operation, and maintenance of rail vehicles.

The study programme includes foundational [courses](#) such as mechanics, electronics and strength of materials. These are followed by courses on rail-related topics and specific technical skills in four main streams – mechanical engineering, electrical engineering, rail technology and rail theory.

Apply now! Study at the University of Pardubice.
